

Celle® Chairs

HermanMiller

## CELLE CHAIRS

### **Durable design, ergonomics, one-of-a-kind appearance**

The Celle chair looks different from other work chairs because it is different. It's the only chair that has Cellular Suspension™, a durable system of cells and loops that properly distributes weight. Cellular Suspension also lets air pass through, another factor in the all-day comfort that Celle provides.

---

#### *cellular suspension*

When Jerome Caruso imagined Celle, he envisioned something brand new—intelligently pliable seat and back surfaces that know how to respond properly when you sit down, work and move. Caruso likens the suspension's effect to buoyancy. Water supports you as you float, forming and reforming as you move.

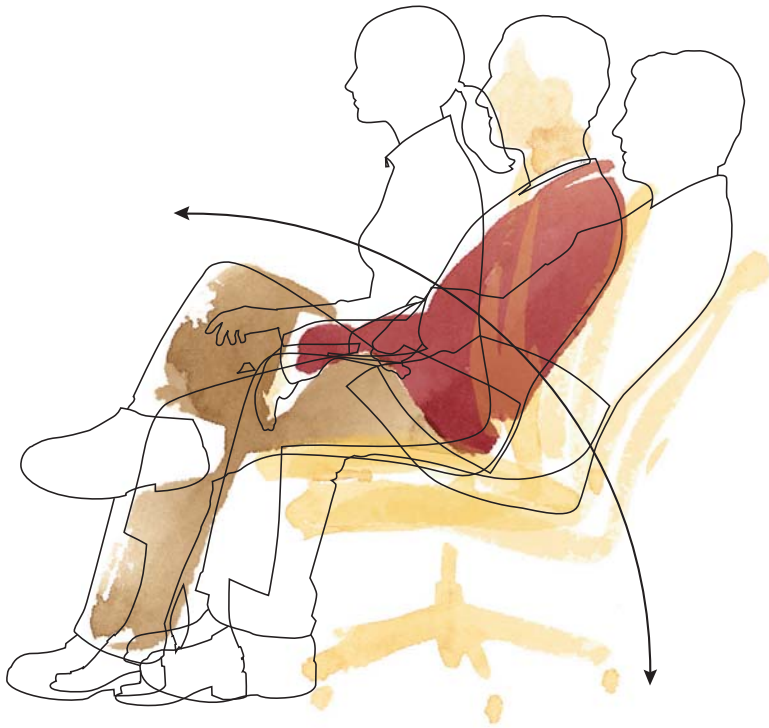

---

One chair size fits the 5th percentile female to 95th percentile male. And Celle meets ergonomic standards and codes worldwide. Shown in Blue Fog seat and back with Graphite base and frame.

## Comfort in Motion

Celle means a smooth ride. Its Harmonic™ tilt lets people move naturally and stay balanced through a generous 28-degree tilt range. With a full complement of adjustments that are easy to locate and use, Celle is highly adjustable.

*harmonic tilt*

To complement the natural support of the Cellular Suspension, Celle incorporates Herman Miller's patented Harmonic tilt. The synchronous, calibrated mechanism lets you move naturally through the chair's wide 28-degree recline range. Without effort, you stay balanced and feel in control.

*Celle fully upholstered*

The Celle fully upholstered chair features a foam cushion seat for added comfort. Designed using Medically-Engineered Technology, it conforms to each person's unique shape for a custom fit. Existing Celle chairs can be easily retrofitted with a choice of 14 fabrics (including Latitude™) and more than 190 colors. Shown in ?

## Down to Earth

Herman Miller's four decades of leadership in ergonomic seating are reflected in the performance and eco-conscious design of the Celle chair. It's a great choice, at a great price, for offices, conference areas, and team and community spaces in business, healthcare, and learning environments.

---

### *straightforward design*

With its transparency, color range, and uncluttered form, Celle lets other furniture and architecture have the spotlight. Shown in Quilty Green Apple seat with Graphite back and frame (left), and Twist Poppy seat with Brownstone back and frame (right).

Full Range of Adjustments

### Materials

Celle complements interiors with a molded-polymer seat and back with an open pattern that lets light and air through. Colors span dark to light, neutral to nature based.

Samples are representative of the material to be supplied and may not indicate an exact match; some variation may occur. The Cella foam cushion seat and fully upholstered chair are available in a number of textiles. The smooth seat pad is only available in Latitude. Visit [hermanmiller.com](http://hermanmiller.com) for the current list of textiles and finishes, detailed application information, material specifications, and information on ordering samples.
